Senior QA Engineer | Automation & Practical Tools

Test Automation | Python | AI-Assisted Tools | Scripting | Docker

Senior QA Engineer with 3+ years of experience building reusable tools and automating validation across complex systems and environments, backed by 16+ years across practical problem solving, system support, and team leadership.

WORK EXPERIENCE

Senior QA Engineer - Applied Materials - *Rehovot, Israel* **2022 – 2026**

Promoted internally from Team Manager to Senior QA Engineer

- Engineered and executed end-to-end testing for NPI (New Product Introduction) and PI (Package Installation) across multi-server systems, validating OS installations, configurations, and updates.
- Built a reusable common test suite deployable across servers, reducing test development time by 50%+ and version-audit / regression time by 80%+ department-wide.
- Automated OS deployment and validation on Linux (Ubuntu, Debian) and Windows Server using Python, Bash, and PowerShell across multi-server clusters.
- Led integration testing of compute, image-processing, and storage servers with network switches in offline cleanroom fabs, maintaining 98%+ deployment reliability.
- Validated Docker and virtualized server environments and adopted AI-assisted tooling (Claude Code, Cursor AI, VSCode) to accelerate test automation.

Team Manager, Global Data Administration & Support - Applied Materials - *Rehovot, Israel* **2020 – 2022**

- Led a 12-person global data administration and support team responsible for the Workday HR platform, Tier 2 support, system maintenance, and software updates.
- Managed large-scale employee data operations, regression testing, and bi-annual SOX and regulatory compliance audits across systems supporting 35,000+ employees.
- Coordinated with HR, IT, and global stakeholders to resolve system issues, maintain data accuracy, and ensure reliable day-to-day platform operations.

Technicians Department Manager - Natali - *Ramat Gan, Israel* **2015 – 2020**

- Managed 22 field technicians nationwide, overseeing installations, upgrades, and service operations for emergency medical devices.
- Restructured regional territory allocation and scheduling, increasing daily throughput from 10–12 to 12–15 customers per technician.

***Earlier Roles*:** Department Manager (**M.I.S.**), Logistics Team Leader & Technical Expert (**Cellcom**) **2008 – 2015**

EDUCATION

B.Sc. Computer Science - Holon Institute of Technology - *Holon, Israel* **2018**

- Focused on Python, software engineering, data structures, algorithms, and databases.

COURSES & TRAINING

- **Python for Everyone** - Coursera (2024)
- **QA & Software Testing** - LinkedIn Learning (2023)
- **Software Testing & QA Foundation** - Applied Materials (2022)

PROFESSIONAL SKILLS

- **Testing & QA:** Manual and automated testing, test automation, regression, integration, NPI/PI qualification, risk-based testing
- **Test Management:** Jira, Xray, test-plan design, defect tracking
- **Scripting & Automation:** Python, Bash, PowerShell, Ansible, Streamlit, custom test engines
- **Virtualization & Containers:** Docker, Docker-Compose, Hyper-V, Proxmox, MS clusters, VM clusters
- **Cloud & AI-Assisted:** Claude Code, Cursor AI, VSCode AI agents, Grok, AWS (basic), Advanced Excel
- **Monitoring & Storage:** Grafana, Zabbix, NetApp, RAID
- **Hebrew** - Native | **English** - Fluent
